Homework 1

Due Friday February 5
Homework 1

Implement the Book/Author database. Write the create table statements and import the data provided in the h1.zip file. Write SQL select statements to answer the following queries.

a. Find the titles of books with between 100 and 200 pages inclusive.

b. Find the titles of books written by Iris Murdoch

c. Find the number of pages written by each author. Include authors who have not written any books.

d. Find the names of authors who have written between 1 and 200 pages inclusive.
Homework 1

• Put your sqlite commands in a text file called h1.txt so you can use .read to run them in sqlite

• After starting sqlite use the following commands
  – .echo on
  – .output h1Results.txt
  – .read h1.txt

• Check the results in h1Results.txt to make sure they are correct

• Email me (tgendreau@uwlax.edu) the file h1.Results.txt

• In the subject line of the email put CS 364 H1
